

Alex Crisses Named to GrowthCap's Top 25 Software Investors of 2022 List

Alex Crisses, Managing Director, Global Head of New Investment Sourcing and Co-Head of Emerging Growth, was named to GrowthCap's Top 25 Software Investors of 2022 List in recognition of his contributions to General Atlantic's software investing efforts. Alex plays an integral role on the Technology investing team and has led 25 technology deals since joining the firm in 2016.

Nominees for this list were evaluated based on the quality of the feedback they received from firm colleagues, portfolio company CEOs and/or peers in the industry. The most highly endorsed were then selected for final rounds, where they were further evaluated based on breadth of deal experience, recent investments and exits, demonstrated leadership and uniqueness of capabilities, among other attributes.

General Atlantic, on behalf of the award recipient, submitted a nomination to be considered for and, once selected, paid to be included on, and to promote inclusion on, this list.
